Summary. Web-based loan origination and servicing with multi-branch operations, role-based access control, integrated accounting, and extensive portfolio and financial reporting.

Loan operations

- Loan products, schedules, interest, fees, and repayment terms (configurable).
- Full loan lifecycle: application through approval, disbursement, servicing, completion, default, and write-off where enabled.
- Individual and group lending; loan officers and branch assignment.
- Collateral, guarantors, loan top-ups, and cash collateral (types and movements) where deployed.

Customers & service

- Customer profiles, documents, and history; registration workflows where used.
- Complaints and announcements; customer API for mobile or partner apps (profile, loans, repayments, applications, complaints).

Dashboard & analytics

- Executive dashboard with KPIs, charts, and activity (permission-based).
- Loan analytics; arrears and delinquency views; configurable arrears classifications and portfolio provisioning views.

Reporting — loans & portfolio

- Portfolio, performance, delinquency, disbursements, repayments, aging (balance and instalment), outstanding, arrears.
- Expected vs collected; portfolio at risk (PAR); internal portfolio analysis; non-performing loans (NPL).
- Portfolio provisioning & arrears classification; exports to Excel and PDF on many reports.

Accounting & treasury

- Chart of accounts; journals with entries and approval / post / reverse flows.
- Payment and receipt vouchers; bank accounts and bank reconciliation.
- Suppliers, bill purchases, budgets; fees and penalties.
- General ledger, financial year, period close; financial statements and management reports (e.g. balance sheet, trial balance, income statement, cash book, cash flow).

Administration & security

- Multi-company and multi-branch; users assigned to branches.
- Granular roles and permissions; activity logging where enabled.
- System settings (rates, fees, penalties, terms, backups, messaging templates).
- Subscription awareness; secure authentication (including OTP / email flows and branch switching).

Regulatory & management packs

- Supervisory-style report modules (e.g. balance sheet, income statement, sectoral loans, interest rates, liquid assets, complaints, agent banking, geographical distribution) where enabled for your deployment.

Module availability depends on your subscription, permissions, and implementation choices. This document is indicative and not a binding specification.
